- Section 5:** Interior detailing
- Section 6:** Exterior paint colours

Section 1: Introduction

Following the design refresh for Discovery at 14MY, 2015 MY adds new technology and feature content designed to keep the car both modern and relevant. It also see the introduction of new SE and SE Tech models alongside the existing HSE and HSE Luxury derivatives, setting a precedent for future naming consistency in the Discovery family.

InControl™ Apps is a brand new feature which enables touchscreen smartphone functionality to be accessed through the car's touchscreen infotainment system. A number of other features first seen on the XXV Special Edition become available to order as options on 15MY cars.

The new SE and SE Tech models bring additional feature content over the GS and XS models they replace.

Discovery continues to win international awards and acclaim for its capability and versatility and is still unsurpassed in the way it can accommodate seven passengers with a blend of real on-road refinement and off-road leadership.

The positioning statement for Discovery remains as *the Ultimate All-Purpose-Vehicle, highly advanced and supremely able for adventurous people who lead big lives.*

2015 MODEL YEAR DISCOVERY

Section 2: Programme Timing and Key Dates

- > First Order Call: 18 June 2014
- > Start of Production: 18 August 2014
- > Start of Sales: 1 September 2014

Section 3: Introduction of new models

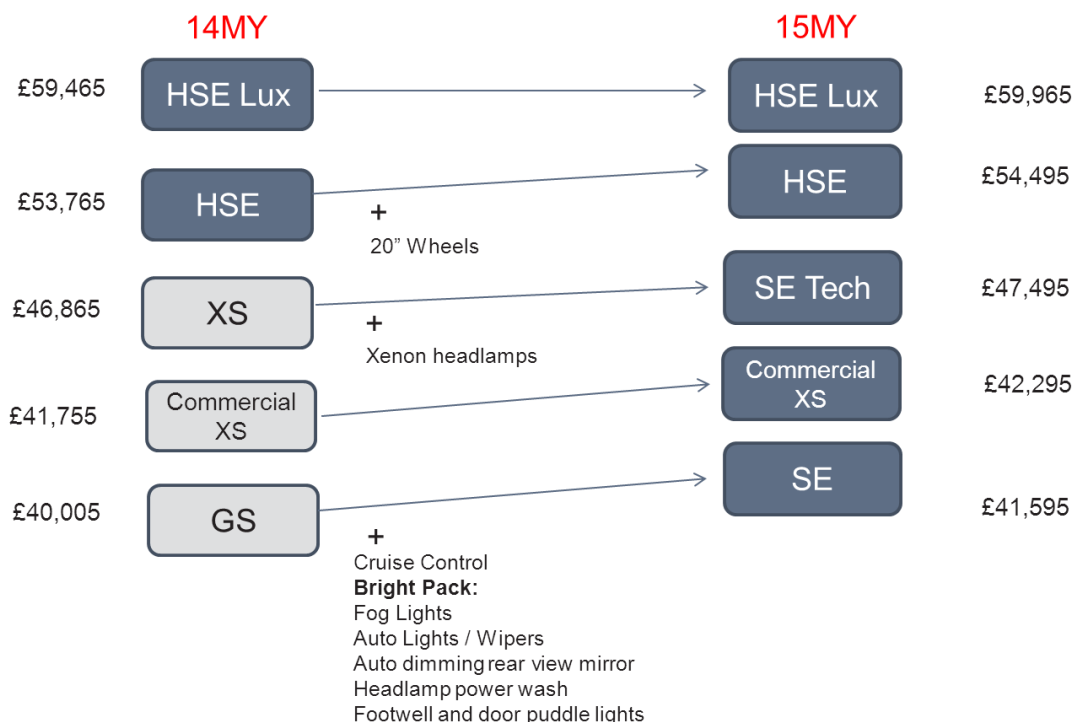

At 15MY **SE** becomes the new entry point to the Discovery range. This adds cruise control, fog lights, automatic headlamps and wipers, headlamp power wash, auto dimming interior rear view mirror and interior foot well and door puddle lamps to the previous entry GS specification at 14MY. **SE Tech** is based on the outgoing 14MY XS specification with the addition of Xenon headlights and LED signature.

HSE variants now feature 20" Style alloy wheels as standard (option 029TJ shown below) to replace the 19" wheels previously standard at 14MY

HSE Luxury and **Commercial XS** specifications remain unchanged.

Section 4: Feature & Technology Upgrades

InControl™ Apps (025PA)

InControl™ Apps, the first introduction uses leading in-car mobile technology to connect smartphone apps to the car's infotainment system, supported initially from Apple iPhone 5 onwards and compatible Android devices (minimum v4.0 - not all devices will be officially supported). Key apps such as Contact, Maps, Calendar and the Music player work out of the box and a stream of locally approved apps will be released over time to ensure a constantly fresh and relevant user experience.

Fig. 1 – InControl™ Apps Architecture (025PA)

At launch the following key apps will be supported on both iOS and Android:

Key Apps on Android and iOS

	Google Maps** ** on Android and iOS Nav not supported		Calendar For organising		Contact For dialling		Player For music playback
---	--	---	-----------------------------------	---	--------------------------------	---	-------------------------------------

Fig. 2 – InControl™ Apps Launch Content

The smartphone will be connected via USB to the Audio Interface Panel which has been (relocated at 14MY to the upper glove box). On InControl™ Apps vehicles, a second dedicated USB connection is added to the panel.
